- Often involve analyzing current economic events or policy proposals.

Sample Eco 202 Assessment Test Questions and Answers

Below are examples of typical questions with brief explanations of the answers to illustrate how to approach them.

Question 1:

What is the law of demand?

Answer:

The law of demand states that, all else being equal, there is an inverse relationship between the price of a good and the quantity demanded. As price decreases, demand tends to increase, and vice versa.

Question 2:

Calculate the price elasticity of demand if the price drops from \$10 to \$8, and quantity demanded increases from 50 units to 70 units.

Answer:

Elasticity = (% change in quantity demanded) / (% change in price)

- % change in quantity demanded = $[(70 - 50) / 50] 100 = 40\%$
- % change in price = $[(8 - 10) / 10] 100 = -20\%$
- Elasticity = $40\% / -20\% = -2$

Since the absolute value is 2, demand is elastic.
